

What is B-Smart...?

B-Smart™ is a comprehensive suite of high performance, business rules driven applications developed to serve the needs of the energy industry.

All B-Smart applications are built upon the same highly configurable B-Smart core architecture that provides them with the flexibility, scalability, reliability and traceability inherent in the core architecture.

B-Smart applications enable the energy industry participants to manage their business critical functions effectively whilst benefiting from significant operational cost savings associated with a fully integrated solution.

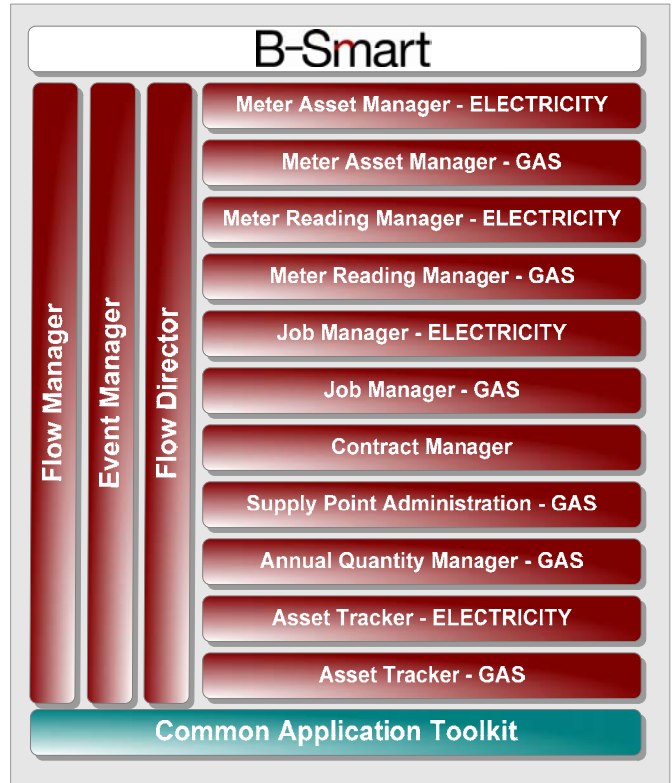

All B-Smart product implementations are supported by a dedicated application support service providing industry compliance into the future.

- ✓ Highly configurable flow engine
- ✓ Managed business process via established 'rules' library
- ✓ Open Architecture
- ✓ Shared Cost of Ownership
- ✓ Reduced Legacy Maintenance
- ✓ Adapts to any Oracle DB structure
- ✓ Adheres to all industry file formats

Our Blue Chip customer base includes:

- British Gas
- Powergen plc
- Siemens plc
- ScottishPower plc
- logicaCMG plc

B-Smart™ Suite Overview

Testimonials

"B-Smart is a world-class meter software suite that, hopefully, will be able to handle all of our metering needs. Metering a core software product for suppliers and that is where I would see Generis' core business"

[Powergen plc]

"As good as any of our blue chip suppliers."

[British Gas]

"Always involved with industry discussions adding to overall credibility"

[ScottishPower plc]
